

## Gylon Cross Reference

Finding alternative materials for critical applications can be difficult but if done correctly can solve delivery or cost problems. Below is our cross reference for Gylon to Durlon PTFE sheet conversions\*.

Durlon 9000 = Gylon 3500 (glass/silica)

Durlon 9000N = Gylon 3504 (glass)

Durlon 9200 = Gylon 3510 (Barium Sulfate)

Durlon 9002 (for Oxygen Service)

Durlon 9400 (for Hydrofluoric Acid and Anhydrous Hydrogen Fluoride)

Durlon 9600 = Gylon 3450/3545

Amerilon/ Durlon Virgin PTFE = Gylon Chemrex 3570

\*This is to be used as a general guide only. Our experience shows the interchange is accurate in most applications. Testing is always recommended when applications are near the maximum ratings for any material.
